

## Vico del Gargano (FG)

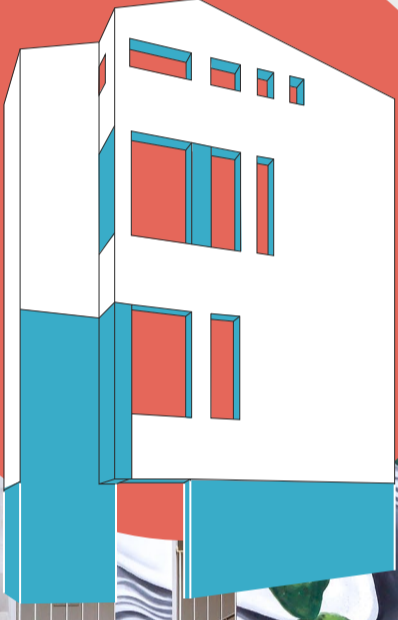

"L'ACCADEMIA DEGLI ECCITATI 2.0: "the urban art turns the LIGHTS on ecology" is a project that wants to enhance the library "Giuseppe del Viscio" through a series of installations of URBAN ART. The project aims to show and revive the deep passion and the history of the Accademia degli Eccitati Viciensi. During the 18th century the Accademia pushed the consciousness and the awareness of the local people and at this point Vico became the only Enlightenment center of Gargano which we have documented sources. The deep meaning of ECCITATI (literally thrilled but with the meaning of to wake up) had the purpose to stimulate the senses and the mind of the people to get off from obscurantism and dogmatism. This became the first action for a contemporary intervention that could be able to switch on the "lights" on topical issues related to ecology.

Energy

ARTIST:  
**LIGAMA**

The prickly pear, an icon of my Sicily and a link with the places of the Gargano, grows spontaneously, impetuously. Symbol of energy, a natural force that arises from the stones of history as well as from the rocks of the Gargano: an energy made of greenery and thorns, which offers colorful fruits. And then the goddess Athena, warrior and virgin, muse of the "Eccitati Viciensi", imagined as a Pandora's box from which Opuntia grows. A reservoir of energy that has its roots in the site and that feeds an energetic and renewable nature. Athena, who defends and advises heroes, instructs industrious women, guides the judges of the courts, protects children. But when she is angry, she becomes ruthless. Here she is divided into three parts to give space to nature, which instinctive and primordial does not care about anything.

Energy

"If burning fossil fuels was so bad that it threatened our very existence, how could we just continue like before?"

[Greta Thunberg]

80%

of energy is produced from fossil fuels

what to do?

RENEWABLE ENERGY  
REDUCING WASTE
